(a) Definitions. As used in this clause--

"Advance shipment notice" means an electronic notification used to list the contents of a shipment of goods as well as additional information relating to the shipment, such as passive radio frequency identification (RFID) or item unique identification (IUID) information, order information, product description, physical characteristics, type of packaging, marking, carrier information, and configuration of goods within the transportation equipment.

"Bulk commodities" means the following commodities, when shipped in rail tank cars, tanker trucks, trailers, other bulk wheeled conveyances, or pipelines:

- (1) Sand.
- (2) Gravel.
- (3) Bulk liquids (water, chemicals, or petroleum products).
- (4) Ready-mix concrete or similar construction materials.
- (5) Coal or combustibles such as firewood.
- (6) Agricultural products such as seeds, grains, or animal feed.

"Case" means either a MIL-STD-129 defined exterior container within a palletized unit load or a MIL-STD-129 defined individual shipping container.

"Electronic Product Code\TM\ (EPC)" means an identification scheme for universally identifying physical objects via RFID tags and other means. The standardized EPC\TM\ data consists of an EPC\TM\ (or EPC\TM\ identifier) that uniquely identifies an individual object, as well as an optional filter value when judged to be necessary to enable effective and efficient reading of the EPC\TM\ tags. In addition to this standardized data, certain classes of EPC\TM\ tags will allow user-defined data. The EPC\TM\ Tag Data Standards will define the length and position of this data, without defining its content.

"EPCglobal" means a subscriber-driven organization comprised of industry leaders and organizations focused on creating global standards for the adoption of passive RFID technology.

"Exterior container" means a MIL-STD-129 defined container, bundle, or assembly that is sufficient by reason of material, design, and construction to protect unit packs and intermediate containers and their contents during shipment and storage. It can be a unit pack or a container with a combination of unit packs or intermediate containers. An exterior container may or may not be used as a shipping container.

"Palletized unit load" means a MIL-STD-129 defined quantity of items, packed or unpacked, arranged on a pallet in a specified manner and secured, strapped, or fastened on the pallet so that the whole palletized load is handled as a single unit. A palletized or skidded load is not considered to be a shipping container. A loaded 463L System pallet is not considered to be a palletized unit load. Refer to the Defense Transportation Regulation, DoD 4500.9-R, Part II, Chapter 203, for marking of 463L System pallets.

"Passive RFID tag" means a tag that reflects energy from the reader/interrogator or that receives and temporarily stores a small amount of energy from the reader/interrogator signal in order to generate the tag response. The only acceptable tags are EPC Class 1 passive RFID tags that meet the EPCglobal\TM\ Class 1 Generation 2 standard.

"Radio frequency identification (RFID)" means an automatic identification and data capture technology comprising one or more reader/interrogators and one or more radio frequency transponders in which data transfer is achieved by means of suitably modulated inductive or radiating electromagnetic carriers.

(b)(1) Except as provided in paragraph (b)(2) of this clause, the Contractor shall affix passive RFID tags, at the case- and palletized-unit-load packaging levels, for shipments of items that--

(i) Are in any of the following classes of supply, as defined in DoD 4140.1-R, DoD Supply Chain Materiel Management Regulation, AP1.1.11:

(G) Class IX--Repair parts and components including kits, assemblies and subassemblies, repairable and consumable items required for maintenance support of all equipment, excluding medical-peculiar repair parts; and

(ii) Are being shipped to one of the locations listed at <http://www.acq.osd.mil/log/rfid/> or to--

(A) A location outside the contiguous United States when the shipment has been assigned Transportation Priority 1, or to--

(3) Regardless of the selected encoding scheme, the Contractor with which the Department holds the contract is responsible for ensuring that the tag ID encoded on each passive RFID tag is globally unique, per the requirements in paragraph (c)(1) of this clause.

The Government reserves the right to unilaterally terminate the use of the purchase card at any time.

1. All ordering offices may use the purchase card as an alternative method of ordering and paying for purchases made under this contract. Purchase card orders are subject to all terms and conditions of this contract, unless otherwise stated in this provision or another provision in this contract.

2. The purchase card is specifically designed for use by the Federal Government. The purchase card is like a typical commercial credit card. However, the authorization limitations of the purchase card are more specific, i.e., only for a particular contract, monthly limitations, certain categories of products or services, etc. The purchase card will be exclusively used for official Government purchases in accordance with the prices, terms, and conditions of this contract. With respect to ordering authority, any authorized user of this contract who is an appointed, recognized Governmentwide Purchase Card holder may use the purchase card as a means of purchasing items on this contract. For purchase card orders only, this waives the requirement for use of other forms that comply with FAR 12.204. All appointed, recognized Governmentwide Purchase Card holders are subject to and responsible for complying with all the rules, regulations, and limits that come with his/her purchase card.

3. Limits for the purchase card are dictated by each using activity major command. These limits for the purchase card are the responsibility of the purchase card holder and the approving office.
4. The Contractor shall accept FFP purchase card orders under the contract made by use of an authorized purchase card.
5. For purchase card orders only, the warranty begins on the day the order is accepted by the Government.

**K. GOVERNMENT CONTRACTORS' USE OF CONTRACT**

However, Government contracting officers shall not grant the Government Contractor authorization to communicate with an AIT-V contract holder without the prior approval of an ACC-RI PCO.

Any request for Government contractor use of the AIT-V contract must be submitted to the following ACC-RI PCO:
